I was going through web investigating this and just to clarify: Even better would be using clang and its linker...

It looks like it should be possible to combine mingw libraries with clang toolchain...

I am really surprised that something like that is not already somewhere for download.

Mirek

AFAIK, no one is allowed to distribute mingw. That is the problem ...

clang can be combined with Microsoft SDK as well ... In this case it is called clang-cl ...

I'll try to check clang with mingw later. I need to work on my own stuff now ...
