cbpporter wrote on Wed, 24 April 2019 09:50A couple of years ago I did manage to compile normal C++ with windows precompiled clang and Windows SDK.

Yeah, thats simple. I can compile with mingw SDK as well. The only problem is that damned linker, which is the whole point of trying.

If it had a faster linker, "mingw" version would be 1000% more attractive. Hell, I might even use it on windows for production development...
