mirek wrote on Fri, 26 April 2019 12:04 Well, Margin is not accounted for in GetHeight, that is the root of problems.

I guess for your particular case, the metrics methods are sort of missing. However, if you look into `ide AssistEditor::SyncAnnotationPopup()` there is complete solution, you just need to account for margins...

Mirek

Thanks! For now I added $(Zx(\text{margin}) + 1) * 2$ to both height and width. Probably not perfect but improved.
