Hi,

Thanks for the info guys. :) I decided to give MinGW a try. Just downloaded the fresh nightly U++ with MinGW. After some tweaking my external library dependencies were satisfied, but for some reason I cannot get rid of the following:

Linking...
lld-link: error: could not open libLIBCMT.a: no such file or directory
lld-link: error: could not open libOLDNAMES.a: no such file or directory
collect2.exe: error: ld returned 1 exit status

There were errors. (1:47.23)

I do not have such libraries defined in my packages.

Any idea how to proceed?

Best regards,

Tom
