Invalid memory access!

X Error of failed request: BadFont (invalid Font parameter)

Major opcode of failed request: 46 (X_CloseFont)

Resource id in failed request: 0x1200002

Serial number of failed request: 23

Current serial number in output stream: 26

by using debug I can figure out PNG Encoder have nothing to do with my crash.

Apprently, the cause is the problem, Since I use StdFont (const Integer That Represent my Font Size) everywhere, maybe can stdFont is buggy on Raspbery / Debian ??
