Hi fasasoftware,

I only used sound once to play some wav extracts and I simply used the system command and a player

Here is a sample code used in linux:

```
void MyPLayerUtilityClass::playFileCB(String file)
{
    String cmd("pkill aplay"); // to be sure to stop other sample already playing
    DoSystemCall(cmd.Begin());
    cmd = "aplay ";
    cmd += file;
    cmd += " &";
    DoSystemCall(cmd.Begin());
}
```

```
playSoundButton <=< THISBACK1(playFileCB, "path/MySample.wav");
```
