## Subject: Re: Strange Architecture Posted by Xemuth on Thu, 18 Jul 2019 12:45:28 GMT View Forum Message <> Reply to Message

Hello Novo,

Thanks for your response ! I'm happy to figure my iea is maybe possible ! Quote:In general, DLLs are loaded/unloaded via dlopen/dlclose calls (in Windows these functions have different names). That's mean I can do near the same code between linux and windows ? or dll in windows and linux don't have same architecture ?

Have good day, Best Regard.
