Xemuth wrote on Thu, 05 September 2019 12:17Hello mirek,

Indeed it don't work since v13495 (G++ -v : 8.1.0) :

<https://www.ultimatepp.org/forums/index.php?t=msg&th=10732&start=0&>

The workaround I find is to use latest version of Mingw64 (G++ -v : 9.2.0) when I want ico instead of mingw toolchain built with Upp.

I still got a version of Upp (v11873)(G++ -v : 7.1.0) with working toolchain, If you want I can give you some information about version of all exe from mingw/bin

Best regard

No need. I know that the problem is between windres and lld.

So currently the choice is between very slow linking times and working icon and fast linking times with icon.

Perhaps I will find a way how to activate original slow linker just for release mode...
