mtdew3q wrote on Sun, 22 September 2019 05:32Hi all-

I am not sure why my schema won't map to GridCtrl.

...

```
eg.AddIndex(ID);
eg.AddColumn(CATID, t_("Category")).Edit(cld);
eg.AddColumn(TASKID, t_("Task")).Edit(tld);
eg.AddColumn(DT, t_("Start Date")).Edit(d1).Default(GetSysDate());
eg.AddColumn(DT2, t_("End Date")).Edit(d2).Default(GetSysDate());
eg.AddColumn(TM, t_("Start Time")).Edit(t1);
eg.AddColumn(TM2, t_("End Time")).Edit(t2);
eg.AddColumn(LOC, t_("Location")).Edit(es);
eg.AddColumn(EVENT, t_("Event")).Edit(ev);
eg.Appending().Removing().Editing().Accepting().Canceling();
eg.RejectNullRow();
// eg.WhenInsertRow = THISBACK(InsertEG);
// eg.WhenUpdateRow = THISBACK(UpdateEG);
// eg.WhenRemoveRow = THISBACK(RemoveEG);
eg.SetToolBar();
```

...

```
TABLE_(SCHEDULE)
INT_(id) PRIMARY_KEY
DATE_(dt)
TIME_(tm)
DATE_(dt2)
TIME_(tm2)
STRING_(loc,40)
INT_(taskId)
STRING_(event,55)
INT_(catId)
END_TABLE
```

Sqlld are case sensitive.
