I need to upload a file within my U++ app to a server, say folder "uploaded".
Is there a ready to use example/reference? I was not able to find it.

Thanks,
Luigi

Which server? FTP? WebDAV?

Mirek

It is not FTP (no authentication).
However I am not sure about WebDAV.

Here is what I want to replicate (more o less)

https://www.w3schools.com/php/php_file_upload.asp

Just a standard file upload, but instead to do it via browser I want use my U++ app.
I think the client side should be done with few instructions.

Thanks,
Luigi
