jjacksonRIAB wrote on Wed, 02 October 2019 11:07Quite a few times I've edited a file, changed some constants and then when I pressed build it undid my changes right before my eyes.

Yeah it happen to me very often:

-I try to build my projet
-Errors occure during the building.
-I look at the errors and quick fix it.
-When I press build & Launch button again the change being undid and the build just start (of course same Errors happen again)
