Hello Luigi,

The function you are looking for is GetFileLength().

```
const char *filepath = "./somedocument.pdf";
```

```
DDUMP(GetFileLength(filepath));
```

```
    // Or
```

```
    FileIn fi(filepath);
```

```
    if(fi) DDUMP(fi.GetSize());
```

```
    //Or (this is basically the same as GetFileLength()
```

```
    FindFile ff(filepath);
```

```
    if(ff) DDUMP(ff.GetLength());
```

Best regards,

Oblivion
