Fudadmin could you also align 'harnesing the real power of c++' to the right?. And please get the blue gradient of the logo back in default look mode (I have default set in my prefrences page)

BTW: If the white layout is the default layout why the default forum look for unregistered users is in those strange (green and brown) colors?

BTW2: Message navigator is non intuitive imho. What is the meaning of 'newer than'?. I think this should be rearranged to:

Messages from date_combo to date_combo Go

Messages from last numer_combo days Go
