Xemuth wrote on Tue, 22 October 2019 11:12Hello community,

I'm looking for something like this :

```
Vector<String> m;  
String& find = m.GetIndex([](String toFind,String inMyVector){return  
toFind.IsEqual(inMyVector);});
```

It allow me to retrieve index of object by calling lambda function.
Do it exist ?

```
int i = FindIndex(m, toFind);
```
