Klugier wrote on Fri, 01 November 2019 14:17The problem with that approach is that code review are extremely hard.

Code reviews are always hard, but I am not sure that going GIT would make them significantly easier. Besides, I believe you can do pull requests against mirror.

Quote:

[code]description "A passive message ctrl and manager for U++\377";

uses

Core,

CtrlLib,

<https://github.com/ismail-yilmaz/terminal-ctrl.git>; // <- Some modification can be saved here like branch used (master by default)

OK, having above capability would not hurt anything. Come back when you have that implemented :)

As for going GIT for core sources, I am very cautious. But you can perhaps try with bazaar first.
