Subject: Re: Proposal: Transition from SVN to GIT within 2020.1 release cycle
Posted by mirek on Sun, 03 Nov 2019 07:21:11 GMT

In current model, theide is open to changes from many developers, documentation can be updated by anybody, Core/SSH is maintained by its author, bazaar is open, sandbox is open.

How would you like to handle this? Would all these become PR based for me to integrate?

What would happen to svn://www.ultimatepp.org/upp/bin/win32 ?
