Hi Mirek,

Yes, now it automatically starts a download from sourceforge. It seems it downloads the 2019.2 source package when accessed from Linux Mint + Firefox and from Windows + Firefox it starts a download for mingw variant of the 2019.2 installer. I think this is a justified policy for the main page quick download link. (No idea what it does when accessed from a Macintosh though. Someone else with a Macintosh can check that.)

Thanks and best regards,

Tom
