Hello Koldo,

I would like to add one thing - it's OK to use "using namespace Upp" or any other namespace in
*.cpp files. It only affects the header file when after including the "using namespace" is inherited.
So, the change with replace "using namespace Upp" in *.cpp files in Scatter was not needed and
doesn't change anything. I think for *.cpp file this statement is more comfortable than "namespace
Upp {" and then at the end you need to remember to add "}".

Sincerely,
Klugier
