Last stable version

I have dozens of files documenting tables in the .sch file
they are in the MyApps/project/srcimp.tpp directory

an example filename is
S_ARTIKEL\$en-us.tpp

if I edit that file it is suddenly
S_ARTIKEL_en-us.tpp

It changes the \$ in the name into an _
this gives problems with svn and the hovering over a topic stops working till I rename it back
