Xemuth wrote on Mon, 23 December 2019 04:11Hello,

Today I tried to put 2 GICtrl in one Frame. It's working but the second GICtrl is not refreshing properly.

I have to perma-resize the Window to make refresh the second.

Here you can take a look of what I'm saying: <https://imgur.com/a/D0tsFNV>

Is it normal ? How Can I fix this ? (I don't think that overwriting Paint method could be the solution)

Thanks in advance

Well, the fastest way to fix this is to provide a testcase :)

I will check and either tell you what is wrong with your code, or (more likely) will fix GICtrl.

Thanks,

Mirek
