Well, the fastest way to fix this is to provide a testcase :)

I will check and either tell you what is wrong with your code, or (more likely) will fix GlCtrl.

Thanks,

Mirek

While I was writing a simple test case It seems to work so I must have done bad code first time.
Sorry for the bad Call.
If some people wonder how I did the test, you can find the testcase below.

Thanks,

Have a good day

Xemuth
