pvector wrote on Fri, 17 January 2020 12:25Hello Mirek,

Apps that are compiled now and TheIDE itself have unusual (swapped) location of buttons OK and Cancel in standard dialogs.

In old gtk2 versions in file ChGtk.cpp:
SwapOKCancel_Write(!Qt);

Now there is nothing like this.

Best regards,
Victor

Thanks, fixed. (I have retained the logic that in KDE it is not swapped).

Mirek
