Subject: Linux binary application distribution options?
Posted by Tom1 on Mon, 20 Jan 2020 14:28:31 GMT

Hi,

I just spent a short while looking for Linux binary application distribution options. After reading about Flatpak and Snappy and the criticism around them I found AppImage. Does anyone here have any experience on this one? Looks interesting to me at least on the first sight.

https://en.wikipedia.org/wiki/AppImage

Best regards,

Tom
