Hello amrein,

IIRC, Fedora uses the pkgconf package for some time (circa F26?), which in turn uses the pkgconf-pkg-config package to replace pkg-config links.

Can you check that?

Packages list requiring the pkg-conf-pkg-config package is long (see "Required by" section)

[https://fedoraproject.org/wiki/Pkg:pkgconf#Required\\_by](https://fedoraproject.org/wiki/Pkg:pkgconf#Required_by)

Best regards,

Oblivion.
