After some discussion with Mirek, I proposed patch for possible minimal set of pkg-config dependencies in uppsrc/CtrlCore and uppsrc/Draw packages:

<https://www.ultimatepp.org/redmine/issues/2007>

I tested build on FreeBSD 10.4 (for examples/AddressBook and reference/ConsoleDraw packages, but also for uppsrc/ide, etc.) for GUI and "GUI X11" main package configurations.

Please test for other platforms, if interested.
