Hello,

i try to create function to test string:

```
bool Verification::testExpressionReguliere( String texte, String expressionReguliere, int longueur )
{
 RegExp regExp(expressionReguliere);
 if ( texte != NULL && !texte.IsEmpty() )
 {
  if ( texte.GetLength() > longueur )
   return( false );
  else
  {
   regExp.Compile();
   return ( regExp.GlobalMatch(texte) );
  }
 }
 else
  return( false );
}

bool Verification::testCaracteresAutorises( String texte, int longueur )
{
 return testExpressionReguliere( texte, "^[\\p{L}\\p{N}&\\-_|=(°)?,'.:!@\\ \\/]{3," +
std::to_string(longueur) + "}$", longueur );
}
```

when i do:

```
Verification verification;
verification.testCaracteresAutorises( "azerty", 10 );
```

i have error:

```
^[\p{L}\p{N}&\-_|=(°)?,'.:!@\ \/]{3,10}$
****************** PANIC: Invalid memory access!

Invalid memory access!
```

Can you help me ?

It's into a Skylark we application.

Thank !
