Xemuth wrote on Tue, 28 January 2020 11:45 Thanks Mirek for having solve my problem,

Another quick question, if the Ctrl didn't had focus before, why mouse event where working fine ?
Isn't Mouseevent supposed to require focus ?

Thanks in advance,
Best Regard.

Xemuth

No, focus is just for keyboard.

BTW, things were a little bit complicated, the real reason why your code was not working outright was NoWantFocus flag in GLCtrl. That prevented TopWindow to assign focus to it on open. I had decided to remove this flag, so your original code would work as is.
