Hi, everyone:

Please advise me how to fix the below problem.

```
#include <Core/Core.h>
using namespace Upp;
CONSOLE_APP_MAIN
{
    Vector<int> vi1,vi2;
    Vector<Vector<int>> vvi;
    vi1<<1<<2;
    vi2<<3<<4;
    vvi<<vi1<<vi2;
    DUMP(vvi); // vvi = [[1, 2], [3, 4]]
}
```

and got error message:

```
...upp/uppsrc/Core/Vcont.h:104:7: note: 'constexpr Upp::Vector<int>::Vector(const
Upp::Vector<int>&)'
    is implicitly declared as deleted because 'Upp::Vector<int>' declares a move constructor or
move assignment operator
class Vector : public MoveableAndDeepCopyOption< Vector<T> > {
    ^~~~~~
```

```
Test: 1 file(s) built in (0:02.91), 2918 msec / file, duration = 2918 msec
```

There were errors. (0:03.34)

The code is working on upp-mingw-11873,
but not work on upp-mingw-13664 & upp-mingw-13916.
under windows 10.

I am sorry for my stupid question and poor english.

Thank you very much
