Didier wrote on Sun, 23 February 2020 11:23 Very nice,

I am always suprised how well things just fit in (when you know very well what is available inside

While taking a look at this example I also decided to open some complex files with SvgViewer and some glitches appeared with the file I tested :

[https://dev.w3.org/SVG/tools/svgweb/samples/svg-files/gallar do.svg](https://dev.w3.org/SVG/tools/svgweb/samples/svg-files/gallar%20do.svg)

LEFT : UPP SvgViewer

RIGHT: Linux image viewer

Well, it looks like the differences are caused by missing filters, which is the part of SVG I did not got to implement yet....
