Trying this in Windows 10 I have got this:

```
HTTP START
Using euw1.api.riotgames.com:443
Starting status 2 'Resolving host name', url: euw1.api.riotgames.com
HTTP Execute: Resolving host name
HTTP StartConnect
HTTP AfterConnect
HTTP retry on error socket(732) / StartSSL: Missing SSL support (Core/SSL)
Starting status 1 'Start', url: euw1.api.riotgames.com
HTTP Execute: Start
HTTP START
Using euw1.api.riotgames.com:443
Starting status 2 'Resolving host name', url: euw1.api.riotgames.com
HTTP Execute: Resolving host name
HTTP StartConnect
HTTP AfterConnect
HTTP retry on error socket(588) / StartSSL: Missing SSL support (Core/SSL)
Starting status 1 'Start', url: euw1.api.riotgames.com
HTTP Execute: Start
HTTP START
Using euw1.api.riotgames.com:443
Starting status 2 'Resolving host name', url: euw1.api.riotgames.com
HTTP Execute: Resolving host name
HTTP StartConnect
HTTP AfterConnect
HTTP retry on error socket(588) / StartSSL: Missing SSL support (Core/SSL)
Starting status 1 'Start', url: euw1.api.riotgames.com
HTTP Execute: Start
HTTP START
Using euw1.api.riotgames.com:443
Starting status 2 'Resolving host name', url: euw1.api.riotgames.com
HTTP Execute: Resolving host name
HTTP StartConnect
HTTP AfterConnect
```
