Hello Mirek,

Can you look at following dark theme issues. I think there should be relatively easy to fix:

- <https://www.ultimatepp.org/redmine/issues/2020>

- <https://www.ultimatepp.org/redmine/issues/2021>

All reports came from Manjaro KDE Edition.

xue38495 - can you provide more information why you want 32-bit version of TheIDE? Also, please tell us what is your operating system?

Sincerely,
Klugier
