Subject: EditTime - how to change format?- [SOLVED]-EditField & Convert

Well the title pretty much describes my query.

When I enter a time into an EditTime widget and leave the field, the time entered is automatically formatted to include the date.

For example, I enter 8:00 and this automatically becomes "01/08/2006 08:00:00" which is more than enough information for my needs. Is there any way to change how this data is displayed?

Thanks,
Garry
