1 - you can call `ProcessEvents();` after the call `if (x % 200 == 0) pi.Set(x++);`

2 -

Quote: `pi.Set(x, 1000);` //how can I get the right number of rows?

`pi.Set(x, s.GetCount() / lineSize);`

in your case, i think, `lineSize = 24.`
