Hi,

I just noticed that the current version has a visualization issue with the edge rectangle of entryfields, lists, etc. I confirmed all these issues on UWord with current version. This can be seen in e.g. standard FileSel where the file and directory lists and the File entryfield all lack vertical edges. Additionally, if the width of the FileSel is increased by dragging, the horizontal edges do not extend all the way to the right edge of each panel. There are also some other corner effects that look strange on UWord main window.

TheIDE does not show these problems for me possibly because I have 'Dark' theme selected there.

Best regards,

Tom
