Hello Koldo,

Quote:
Copying *.bm
cp: cannot stat '*.bm': No such file or directory

Yes, I can confirm this, now.

I downloaded the U++ nightly, and I've got the same error with GCC.

The reason is GNU cp seems to differentiate between "*.bm" and "*.bm.in".

I don't know why the build method files have the ".bm.in" extension though. (clash ?)

Renaming the files with ".bm.in" to ".bm" (or vice versa) resolves THAT error for me.

Best regards,
Oblivion
