koldo wrote on Sun, 29 March 2020 17:01It works in Ubuntu 18.04 LTS.
By the way, I thought this was not possible. This way, could be deployed binaries in Linux?

Well, the problem is that not all libraries have static variants. With umk, we are lucky, but you basically cannot build GUI application as required libraries are .so only.

(Also, this binary is AMD64 only, but I guess that is less of a problem.)
