There should be

```
enum {  
    ORACLE    = 1,  
    SQLITE3   = 2,  
    MYSQL     = 4,  
    MSSQL     = 8,  
    POSTGRESS = 16, // not implemented yet  
    FIREBIRD  = 32, // not implemented yet  
    DB2       = 64, // not implemented yet  
};
```

At the beginning of Sqlexp.h.

But you might be trying some other version perhaps (and the problem is something else). Which version?
