amrein wrote on Mon, 06 April 2020 10:01Here is an updated buildrequires.posix file Mirek.

I tested umk and theide dependencies in those POSIX distributions.

Thanks, this is very helpfull. I think we should add openssl too - while not required for theide at the moment, many examples and a lot of code needs it right away.

I believe it is "openssl-devel" in rpms.
