Hi,

I'm using Core/SSH and and Core/SSL and just as the title says: How to link libeay32, libssl32 and ssleay32 statically in Windows?

I seem to remain dependent on:

libeay32.dll

libssl32.dll

ssleay32.dll

I used MSBT19x64.

I also tried CLANGx64 but then I ended up with missing libraries:

Linking...

lld: error: unable to find library -llibeay32MT

lld: error: unable to find library -lssl32MT

clang-10: error: linker command failed with exit code 1 (use -v to see invocation)

There were errors. (3:58.39)

Is there a way to get them statically linked to avoid dependence of those DLLs?

Best regards,

Tom
