Ok, I wasn't sure if you were talking about grid scrollbars or volume and position indicator which can be treat as some kind of scrollbars. Anyway, try to paint the image with scrollbars you would like to have. Maybe then it would be easier to Mirek modify (if u++ community accept new look) the scrollbar paint routine.

> I played a ".mid" file

Thanks for info. Frankly I have only played the mp3 streams... My player is definitely unfinished, but I wanted to encourage the others to public their work here.

Anyway, expect new version soon
