Subject: SelectFileOpen and VPN
Posted by idkfa46 on Fri, 17 Apr 2020 09:58:53 GMT

Hi all,
I'm trying to open and go through directories using

SelectFileOpen("*.txt")

I have no problem navigating into my PC directories but I'm not able to access the shared driver at the following path:

\\Miel07\psa-ita-mi$\DM\DVPS\BDAC\MATTEO

At the moment I'm connected through VPN and I receive the following error:

Is it a VPN problem? is there something to take into account?

Best,
Matteo
