Hi Mirek,

Two things about the changes:

```
 case WM_PAINT:
  DLOG("WM_PAINT " << Name(this));
```

The above DLOG in Win32Proc.cpp prevents Release mode compilation.

Second: RectTracker no longer works at every drag direction. It used to allow it after:

tracker.MinSize(Size(-100000,-100000));

Well, maybe it works behind the scenes, but it does not show the rect on screen for north or west
drag directions.

Best regards,

Tom
