Two things about the changes:

 case WM_PAINT:
  DLOG("WM_PAINT " << Name(this));

The above DLOG in Win32Proc.cpp prevents Release mode compilation.

Second: RectTracker no longer works at every drag direction. It used to allow it after:

tracker.MinSize(Size(-100000,-100000));

Well, maybe it works behind the scenes, but it does not show the rect on screen for north or west
drag directions.

Best regards,

Tom

Fixed.

Thanks! RectTracker works beautifully now. And also my inherited LineTracker. :)

BR, Tom
