---

Hello,

I am just testing theide.desktop solution and TheIDE icon is not present in the toolbar. It seems that theide.desktop should do not use path:

```
Icon=/home/klugier/upp/.config/u++/theide/theide.png
```

Instead of it icon should simple called

```
Icon=theide
```

And image content should be copied to `/home/klugier/.local/share/icons/hicolor/${resolution}`. Then everything should work correctly.

Sincerely,  
Klugier
