Hello,

I am just testing theide.desktop solution and TheIDE icon is not present in the toolbar. It seems that theide.desktop should do not use path:

Icon=/home/klugier/upp/.config/u++/theide/theide.png

Instead of it icon should simple called

Icon=theide

And image content should be copied to /home/klugier/.local/share/icons/hicolor/${resolution}. Then everything should work correctly.

Sincerely,
Klugier
