Hello Pradip,

You mean something like this (with time on X axis) ?

I recently added the capacity to display fully custom data (with mouse interactions) just for the same reasons ;)
and I am currently working on adding full Chameleon compatbility changes still need to be done :
Layout designer properties do not work anymore (du to Chameleon modifications) made corrections to the property editors
So the Package is still work in progress
I will upload the current state so that you can play around with it
