Hi!

I download it, re-compile theIde and works fine... except
This file TCtrlLib/appdoc.tpp/DlgCalc$cs-cz.tpp in package breaks the system. See
http://www.arilect.com/upp/forum/index.php?t=msg&th=1397 &start=0&.

Core/Local.cpp. I find it doing "find in files".

Clipboard in Linux doesn't work correctly. With himself not to find out in what conditions fail. It seems that it uses clipboard private that communicates bad with the general.
