Subject: how align a column? Posted by nicomesas on Mon, 18 Sep 2006 12:16:17 GMT

Hey

I have a ArrayCtrl in which a column represents money and I build it thus:

theList.AddColumn("donativo").SetFormat("%2!nl").HeaderTab().SetAlign(ALIGN_RIGHT);

The numerical columns see far better if they are aligned to right.

Nevertheless the alignment only affects to the header, not to the data in the column.

I believe that it must be possible that all a column is aligned, but encounter the function or the method not to do it.

Somebody can give an instructions to me.

Nico
