Hello Pradip,

Pradip wrote on Thu, 28 May 2020 18:52Hello Didier,

Really amazing work with the GraphCtrl!

Is there a way to allow only X axis zooming but prevent Y axis zooming?

Thank you and yes there is:)

Several restriction methods are available for zoom / scroll (these are also available directly through the layout designer as options)

DisableGraphZoom

DisableGraphScroll

DisableAxisZoom

DisableXZoom

DisableYZoom

DisableAxisScroll

DisableXScroll

DisableYScroll

Quote:Please tell me, is there an easy way to flip the Y axis? Currently the origin is in bottom-left, how to make it in top-left?

Well I never needed this so it isn't available out of the box, but it should be quite easy to do. I'll see if I can add a 'void InvertAxis()' method: this may come handy one day
