Hello Pradip,

Pradip wrote on Thu, 28 May 2020 18:52Hello Didier,

Really amazing work with the GraphCtrl!
Is there a way to allow only X axis zooming but prevent Y axis zooming?

Thank you and yes there is :)
Several restriction methods are available for zoom / scroll (these are also available directly through the layout designer as options)

DisableGraphZoom
DisableGraphScroll
DisableAxisZoom
DisableXZoom
DisableYZoom
DisableAxisScroll
DisableXScroll
DisableYScroll

Quote:Please tell me, is there an easy way to flip the Y axis? Currently the origin is in bottom-left, how to make it in top-left?
Well I never needed this so it isn't available out of the box, but it should be quite easy to do.
I'll see if I can add a ' void InvertAxis()' method : this may come handy one day
